Projects

FACE MASK DETECTION

Technology :- Python

It works by identifying and measuring facial features in an image. Facial recognition can identify human faces in images or videos, determine if the face in two images belongs to the same person, or search for a face among a large collection of existing images.

AI Multi Agent Shopping System

Technology:- HTML, CSS, JAVA SCRIPT, REACT
EXPRESS & MONGO DB

It works as a online shopping website base platform by which user can buy various types of products.
